

Flexibility:

The TA-2703 weatherized horns can operate on either 12V or 24V, with no setting required; the device recognizes and self-adjusts to the correct current automatically.

Aesthetics:

Selectable volume horns incorporate the same stylish, low profile design of the conventional Thomas products, for a consistent and aesthetically pleasing appearance across the entire product line.

Features:

- Operates on either 12V or 24V
- Lower Current Draw
- Rotary switch selection for horn options
- Easy mounting with included box.

Specifications:

- Current: 150mA max
